

The future of design
will be open

Designing for the future

UI/UX Conference - The future of design will be open

Nope.

Nope.

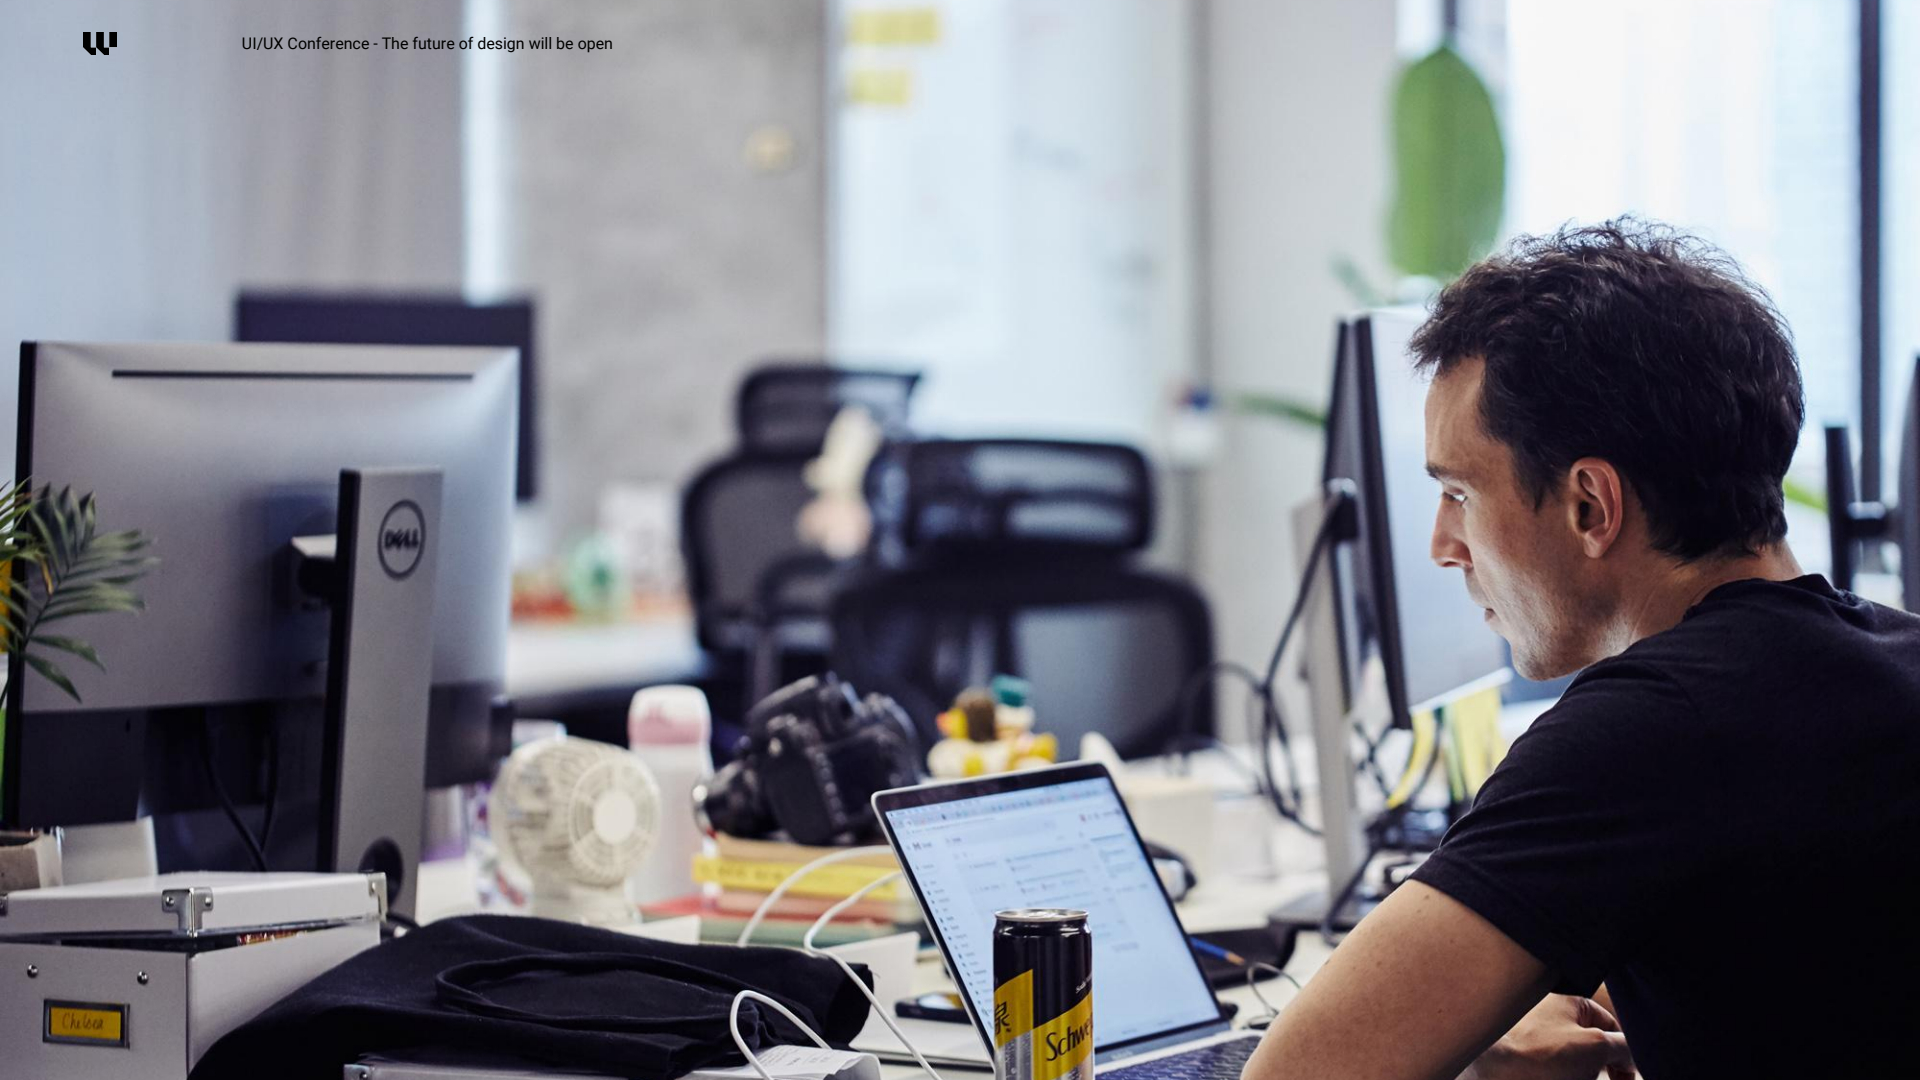

Collaboration.
Through software.

Who am I?

Nerd.

Designer.

French (I may swear).

~~Adobe~~

~~Inkscape~~

Sketch?

Figma

Collaboration?

Designers work in silos.

We learn from
others & failures.

I ~~ranted~~ talked about it.

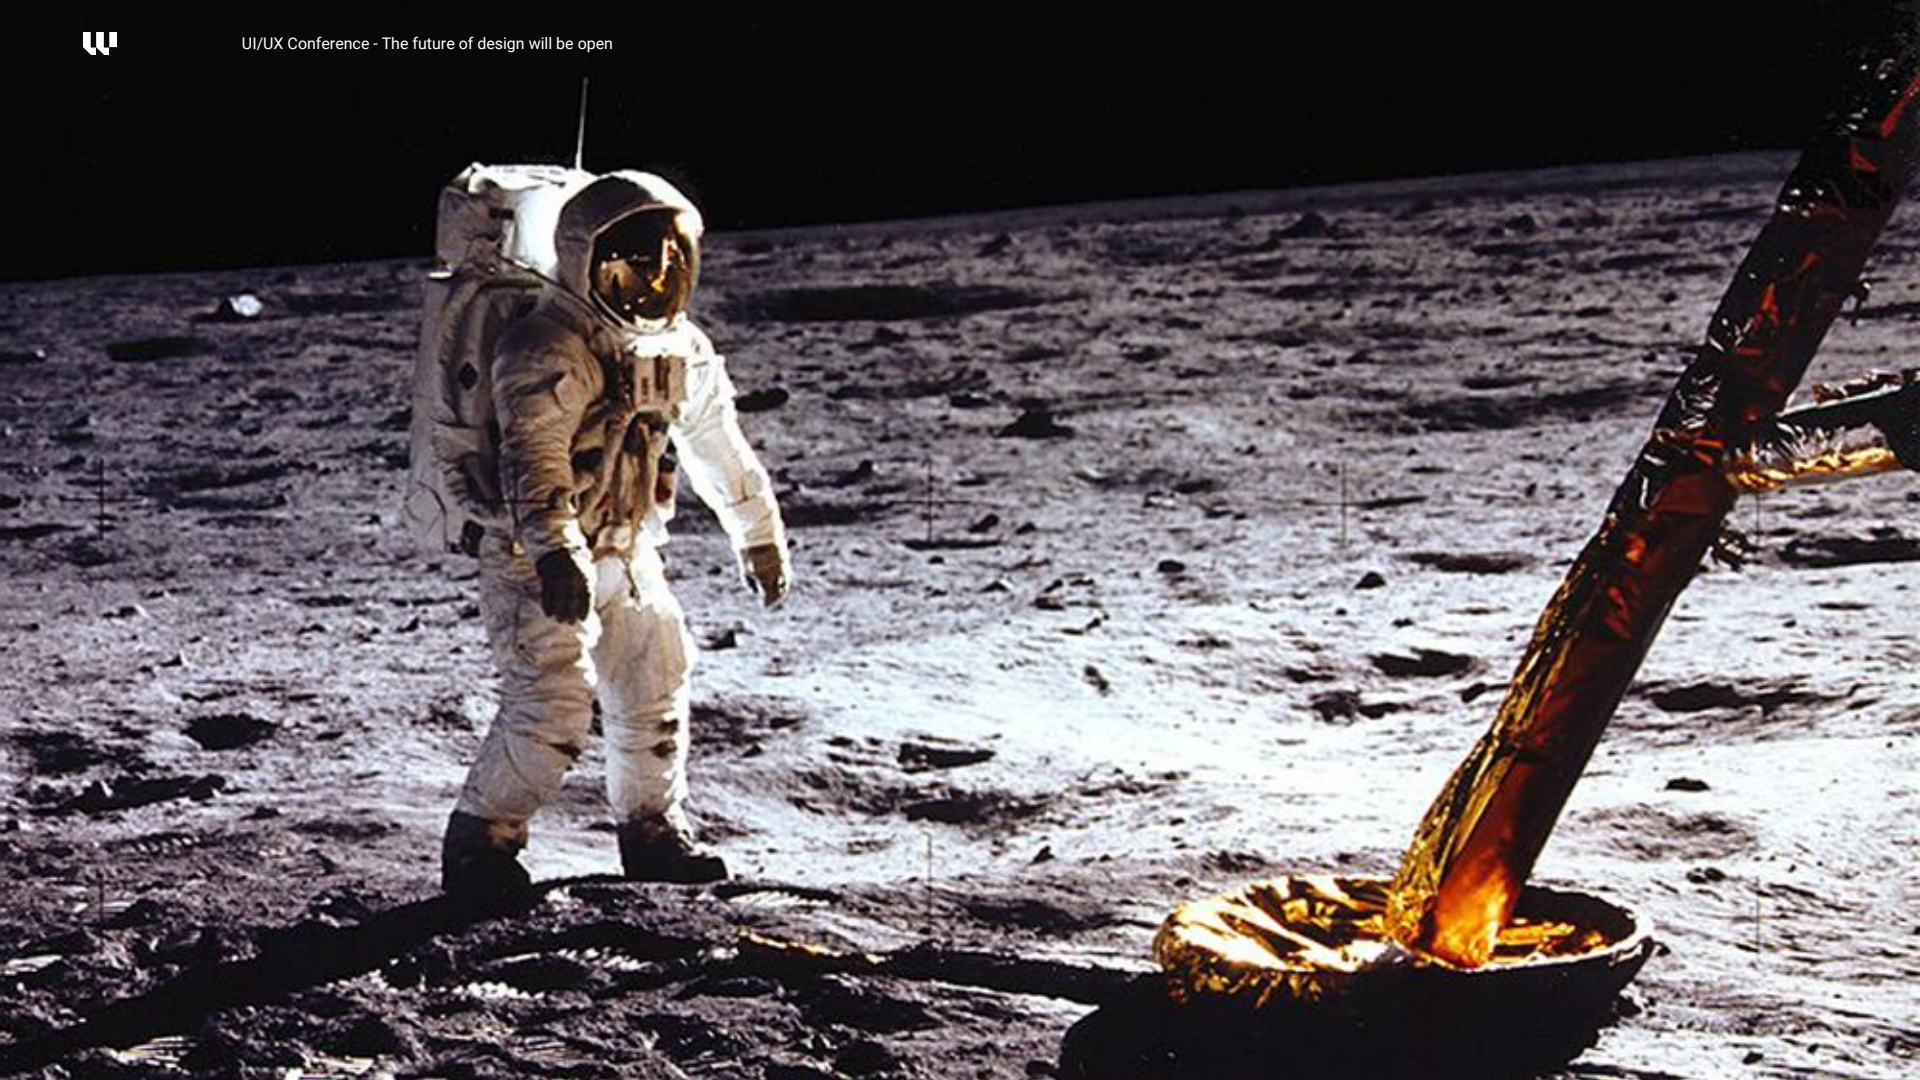

What's important then?

Nope.

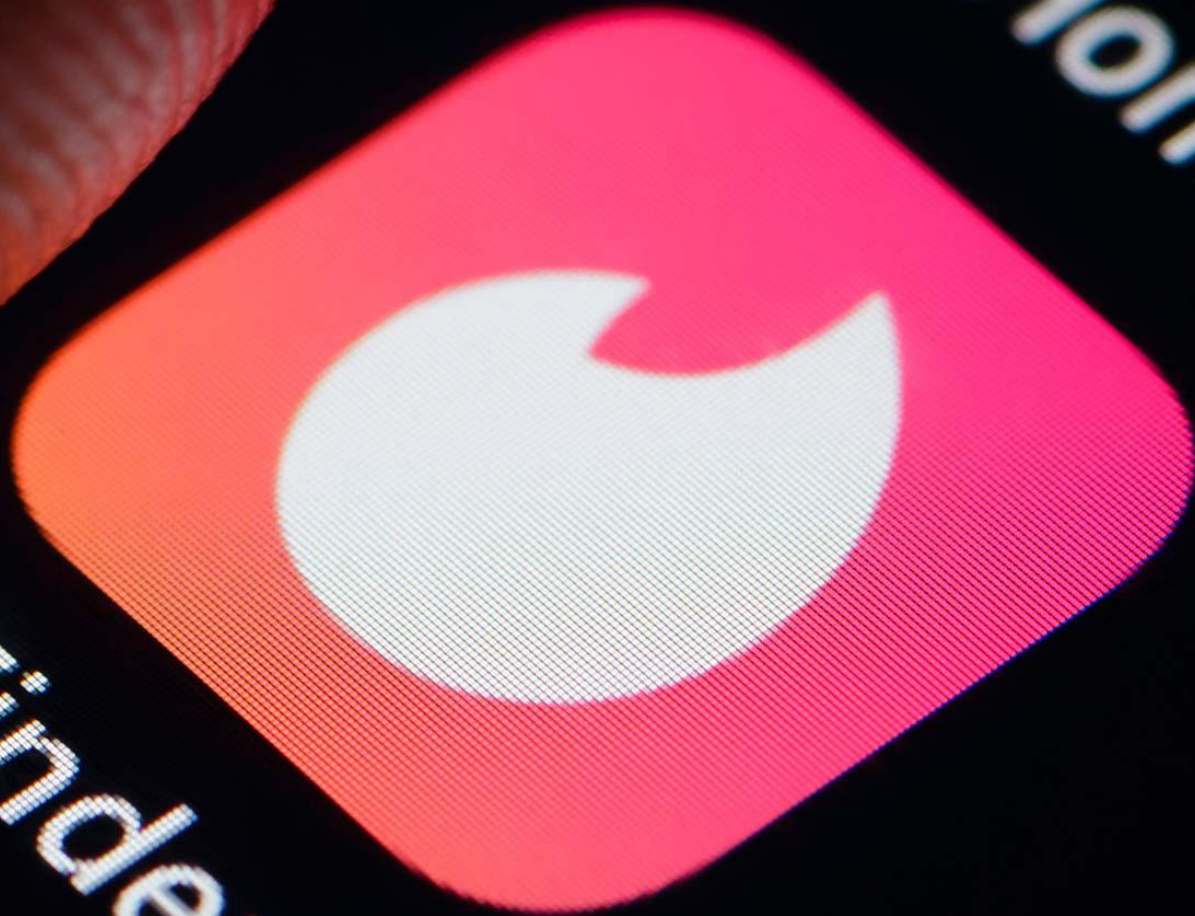

What's the difference?

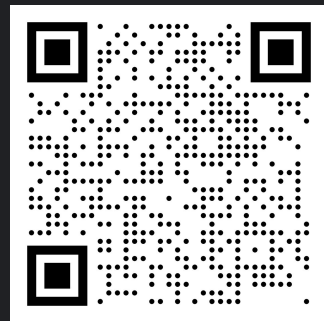

Tinder

Home

~~Methodology~~
Collaboration
Openness

Collaboration done right:
the software community.

File format types

Node specific properties

The following is the catalog of properties nodes have that are not in the global property list, based on the type of node that it is.

DOCUMENT

The root node

CANVAS

Represents a single page

FRAME

A node of fixed size containing other nodes

`children` `Node[]`

An array of canvases attached to the document

`children` `Node[]`

An array of top level layers on the canvas

`backgroundColor` `Color`

Background color of the canvas

`exportSettings` `ExportSetting[]`

default: `[]` An array of export settings representing images to export from the canvas

`children` `Node[]`

An array of nodes that are direct children of this node

`backgroundColor` `Color`

Background color of the node

`exportSettings` `ExportSetting[]`

default: `[]` An array of export settings representing images to export from node

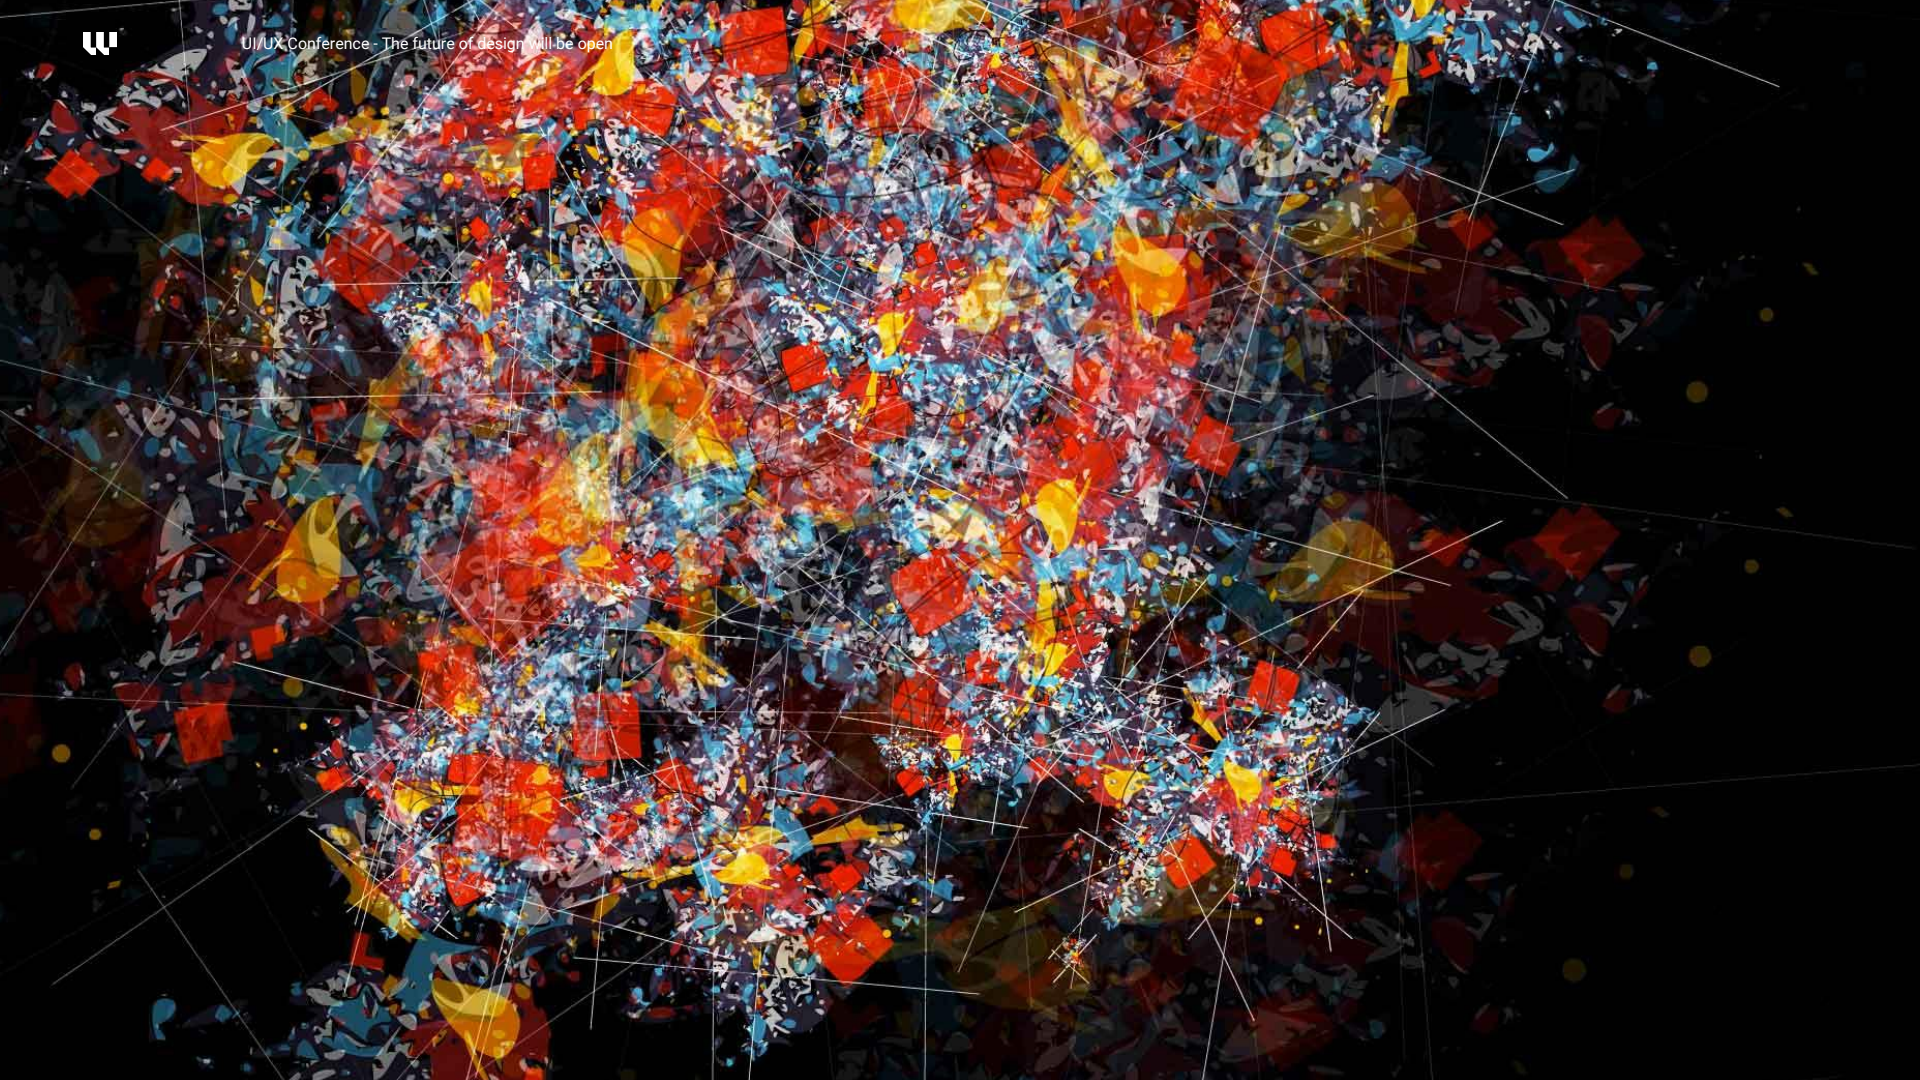

`blendMode` `BlendMode`

How this node blends with nodes behind it in the scene (see blend mode section for more details)

`preserveRatio` `Boolean`

Hard to grasp the potential

Q

2.1K

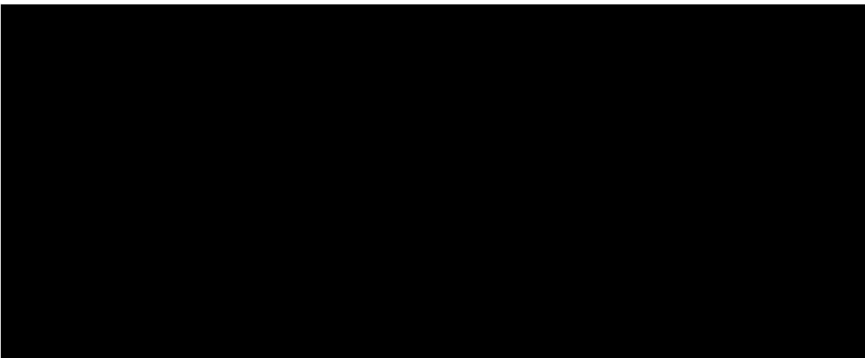

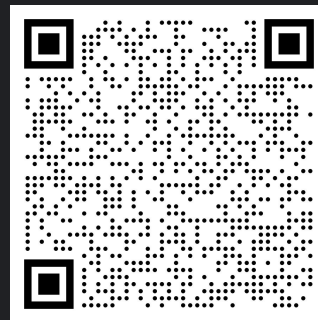

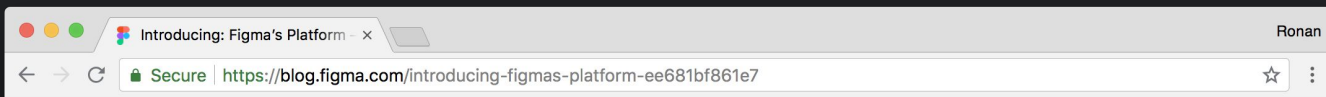

5. Syncing Figma designs to React components

One of the API opportunities we are most excited about is the potential for automatically converting Figma to other frameworks. We're already seeing it: PageDraw introduced [a React integration](#) for others to use, and [Sara Vieira](#), a front end developer from Portugal, built [a way for React components to be rendered directly](#) from a Figma file using the aforementioned [GraphQL connector](#) she worked on (👏).

Introduction

This is a prototype Javascript API for Sketch. It's still a work in progress, but the intention is to make something which is:

- native Javascript
- an easily understandable subset of the full internals of Sketch
- fully supported by Bohemian between releases (ie we try not to change it, unlike our internal API which we can and do change whenever we need to)
- still allows you to drop down to our internal API when absolutely necessary.

The idea is to keep this API as lean-and-mean as possible. The main reason for that is that if we (Bohemian) are committing ourselves to making sure that we don't break it, then it's essential that doing so doesn't become an unmanageable task.

Again, this is very much a work in progress, so comments and suggestions for this API are welcome - send them to developers@sketchapp.com, or open an issue to have a public discussion.

Plugins

Sketch Utilities

README.md

WORLD WIDE WEB

The WorldWideWeb (W3) is a wide-area hypermedia[1] information retrieval initiative aiming to give universal access to a large universe of documents.

Everything there is online about W3 is linked directly or indirectly to this document, including an executive summary[2] of the project, Mailing lists[3] , Policy[4] , November's W3 news[5] , Frequently Asked Questions[6] .

What's out there?[7]Pointers to the world's online information,
subjects[8] , W3 servers[9], etc.

Help[10] on the browser you are using

Software Products[11] A list of W3 project components and their current state. (e.g. Line Mode[12] ,X11 Viola[13] , NeXTStep[14] , Servers[15] , Tools[16] , Mail robot[17] , Library[18])

Technical[19] Details of protocols, formats, program internals
etc

<ref.number>, Back, <RETURN> for more, or Help:

The revolution will be open

Thanks.
